(Eastern Time)

Inspecting, Testing and Maintaining Fire Sprinkler Systems: An Overview of NFPA 25 Requirements

Building owners and facility managers have important responsibilities for the proper maintenance of fire sprinkler systems. Most jurisdictions have adopted NFPA 25 as the standard that guides the inspection, testing and maintenance of these systems. The importance of these activities is described in the standard: "History has shown that the performance reliability of a water-based fire protection system under fire-related conditions increases where comprehensive inspection, testing, and maintenance procedures are enforced." This webinar is intended to help building owners, facility managers, management companies, Authorities Having Jurisdiction (AHJs), and others understand their responsibilities under NFPA 25: Standard for the Inspection, Testing and Maintenance of Water-Based Fire Protection Systems.

Click [here](#) to register

You'll learn:

- The responsibilities of building owners for maintaining their sprinkler systems
- Definitions from the standard that outline the role of the building owner and the inspector
- The basic requirements for properly inspecting and testing sprinkler systems and their components
- The steps that should be taken when system deficiencies and impairments are found – and the additional tests required when they're corrected
- The difference between an internal pipe inspection and an obstruction investigation

A Certificate of Attendance Will Be Issued to All Participants

Meet Your Presenters:

Terry Victor, *National Manager of Sprinkler Business Processes* at SimplexGrinnell, has over 36 years of technical experience in the sprinkler industry. He serves on various industry boards and committees including the NICET Fire Protection Advisory Group, is SimplexGrinnell's representative on the NFSA Contractors Council, and is current chairman of the NFSA Engineering & Standards Committee. He is a member of several NFPA technical committees including those for NFPA 13, NFPA 13D, NFPA 13R, NFPA 20, & NFPA 25.

Frank Monikowski, *Fire Sprinkler and Special Hazards Marketing Manager* at SimplexGrinnell, has over 37 years of experience in the Fire Protection field. He is a member of the National Fire Protection Association, the Society of Fire Protection Engineers, the American Fire Sprinkler Association and the National Fire Sprinkler Association. He is also a past Board of Directors member for Associated Builders and Contractors. In addition, Frank serves on the NFPA 804, 805, and 806 Standards committee for Fire protection for Nuclear Facilities.
